Dear Mr. Flores

I'm sorry to say that Oswald in New Orleans has long been out of print. I did not publish it myself and I have no copies.

The other books are available, as per the enclosed price list.

I've not heard of a copy of Fletch Prouty's book being available for years. Best chance, I think, would be a store specializing in such books or finding one second hand.

You ask what I regard as the right question about Farewell America.

Stay away from it. It is not, as you say, by Bill Turner, who was promoting it and who was responsible for funnelling it to Garrison. It is a fake book by the French CIA known as SDECE.

Your question was, "Can you steer me in the right direction?"

SDECE's honcho on that disinformation was a man who used the name Herve Lamarre and the pen name James Hepburn.

Best wishes,

Harold
